

## Volunteer Needed to Sift Through Conservation History

The Native Ecosystems Protection and Management Section, Division of Forestry and Wildlife, Department of Land and Natural Resources is seeking someone with librarian or archive experience and skills to assist us in organizing and archiving several decades of historical documents. Tasks will include scanning of old paper documents to electronic files, organizing electronic files, and sorting and minimizing paper files. This is an opportunity to learn about the historical development and current status of many programs including the Natural Area Reserves System, Natural Area Partnership Program, Watershed Partnerships Program and others. Volunteer Hours are flexible but we ask that volunteers commit to 4 hours a week for 3 months.
